SMALL CHASSIS WASHERS AND DRYERS

DESIGNED FOR LONG-LASTING, COMMERCIAL USE.

At UniMac®, washers and dryers are considered more than just laundry equipment. They are key players in the success of on-premises laundry facilities. Our equipment is designed to perform in true OPL environments – and we continually innovate to achieve high levels of efficiency, quality and durability. UniMac products are built to work harder and last longer, from the design to the premium-grade components they are constructed of, our products are engineered to withstand the rigors of commercial applications like nothing else on the market. UniMac invests to deliver more in the on-premises laundry industry.

FRONT LOAD WASHER

The UniMac front load washer is energy and water efficient to help reduce operating costs, while fast cycle times and high G-Force extraction ensure maximum throughput.

- Dynamic balancing technology for maximized productivity
- Ultra-High 440 G-Force to maximize moisture removal and minimize dry times
- Less vibration delivers near silent operation
- Extra-large capacity helps to maximize throughput while minimizing costs
- Upgraded bearing protection system ensures worry-free performance.

Electronic Control system features a time-remaining display, six preset cycle buttons, cycle adjustability, additional cycle options and status indicator lights.

TOP LOAD WASHER

Every on-premises laundry facility needs durable equipment that can get laundry done on time and on budget. UniMac's top load washer is the answer to small on-premises laundries or large-scale operations that wish to supplement their current lineup with smaller alternatives.

- Front serviceability provides easy access to all major components from the installed position
- Rugged suspension system to handle bulky loads with ease
- Durable stainless steel tub that is rust resistant and lifetime guaranteed
- Agitator delivers exceptional wash performance.

The E-Mech Control system has a straight forward design that offers simple water temperatures and fabric selections, as well as lights that monitor the wash cycle progress.

COMMERCIAL DRYER

UniMac light commercial on-premises laundry dryers offer extra large drying capacity in a compact size. They also feature unmatched reliability to deliver ultimate productivity.

- Extra large drying capacity allows you to handle sizable loads
- Front serviceability allows easy access to major components
- Smooth baffles for maximum dry air movement

Electronic Control system features a time-remaining display, six preset cycle buttons, cycle adjustability, cycle and moisture level indicator lights.

The E-Mech Control system has a straight forward design that offers simple temperature and fabric selections, as well as cycle status indicator lights.

STACK WASHER-DRYER & STACK DRYER

By stacking the dryer on top of the washer, you gain a large amount of floor space and can place equipment in places that were never before possible. The utility connections are identical to those used in residential-style equipment, and there's no extra work required. Electrical cords are provided in the USA for gas dryers only. In Canada cords are included for both gas and electric dryers.

- Extra-large 7.0 cu.ft (dryer) capacity needs very little space yet easily handles sizable wash loads
- Large door (dryer) opening is 2.06 sq.ft, one of the largest in the industry

Electronic Control system features a time-remaining display, six preset cycle buttons, cycle adjustability, additional cycle options, cycle status and moisture level indicator lights.

The E-Mech Control system has a straight forward design that offers simple temperature and fabric selections, as well as cycle status indicator lights.

PARTS WARRANTY

1. FRONT LOAD WASHER

One year – any part on the entire machine.

2. TOP LOAD WASHER

Three years – any part on the entire machine

Five years – the transmission assembly

Lifetime – the stainless steel washtub

3. COMMERCIAL AND STACK DRYER

Three years – any part on the entire machine

4. STACK WASHER-DRYER

One year – any part on the entire machine

Proudly based in Ripon, Wisconsin, USA, UniMac is dedicated to research, development and testing to provide equipment that delivers industrial strength and long-lasting quality. Our products undergo a 5-stage product-development process and are pushed beyond their limits in our state-of-the-art test lab to ensure they exceed the toughest demands of the commercial environment and meet our customers' highest standards.
